

# SMALL FLANGE REMOTE SEAL TYPE PRESSURE TRANSMITTER

DATA SHEET

FKW...5

The FCX-AIII small flange remote seal type pressure transmitter accurately measures gauge pressure and transmits a proportional 4 to 20mA signal.

The transmitter utilizes a unique micromachined capacitance silicon sensor with state-of-the-art microprocessor technology to provide exceptional performance and functionality.

Totally welded construction of the seals assures excellent reliability in high temperature and highly corrosive process conditions.

## FEATURES

- 1. Directly connectable to 1-1/2in and 2in flanges**  
The transmitter is connectable to 1-1/2in and 2in pipes without a reducer.
- 2. Connectable to 1/2in and 3/4in pipes**  
Use of direct mounting adapter allows the transmitter to be connected to the following process.  
1/2in and 3/4in flanges  
Screw connection 1/2-14NPT, 3/4-14NPT, Rc1/2, Rc3/4
- 3. Minimum environmental influence**  
The "Floating Cell" design which protects the pressure sensor against changes in temperature, and overpressure substantially reduces total measurement error in actual field applications.
- 4. Fuji/HART® bilingual communications protocol and FOUNDATION™ fieldbus and Profibus™ compatibility**  
FCX-AIII series transmitter offers bilingual communications to speak both Fuji proprietary protocol and HART®. Any HART® compatible devices can communicate with FCX-AIII. Further, by upgrading electronics FOUNDATION™ fieldbus and Profibus™ are also available.
- 5. Application flexibility**  
Various options that render the FCX-AIII suitable for almost any process applications include:
  - Full range of hazardous area approvals
  - Built-in RFI filter and lightning arrester
  - 5-digit LCD meter with engineering unit
  - Stainless steel electronics housing
  - Wide selection of materials
  - High temperature, vacuum seals
- 6. Burnout current flexibility (Under Scale: 3.2 to 4.0mA, Over Scale: 20.0 to 21.6mA)**  
Burnout signal level is adjustable using Model FXW Hand Held Communicator (HHC) to comply with NAMUR NE43.
- 7. Dry calibration without reference pressure**  
Thanks to the best combination of unique construction of mechanical parts (Sensor unit) and high performance electronics circuit (Electronics unit), reliability of dry calibration without reference pressure is at equal level as wet calibration.
